- Wednesday 17:00 - 19:30

Description

TECHNITAL is a private joint stock company established more than 50 years ago (in 1964) and is one of the oldest engineering consultancy companies in Italy. Thanks to its high level of expertise, its dynamic nature and versatility, management autonomy and efficiency and its sophisticated hardware equipment and software libraries, the Company has been awarded large scale international and national projects by major public and private entities and by international funding organizations. TECHNITAL currently has offices in Italy in Milan and in Verona. The organization abroad of TECHNITAL includes 11 between branches and stable organizations in Croatia, Djibouti, Georgia, India, Iraq, Poland, Qatar, Romania, Trinidad & Tobago, Uruguay and Zambia and a number of local offices which is continuously changing according to the on-going international projects (at the moment there are 5 local site offices). Technital has recently got license to operate in BiH. In these more than 50 years professional activity, Technital spa have successfully implemented numerous projects financed by International Financial Institutions: World Bank(WB), European Bank for Reconstruction and Development (EBRD), the European Investment Bank (EIB); European Commission; African Development Bank, Asian Development Bank among the others (recently in Croatia, Albania, Georgia, etc). TECHNITAL is a dynamic company whose sectors of activity cover transport infrastructure (roads and motorways, railways, inland waterways, urban transport, ports and airports), hydraulics (water treatment and desalination plants, dams, aqueducts, sewerage systems, waste water treatment), maritime and coastal engineering, environmental and sanitary engineering (dump sites, recycling plants, incineration and waste to energy plants), buildings and architecture. In each of these sectors TECHNITAL provides innovative project solutions to Government Agencies, International Financial Institutions and Private Sector Organizations. The company covers the full range of services, from planning and feasibility studies through to detailed design, works supervision and technical assistance. TECHNITAL has worked in several countries world-wide and also in the region (see highlighted countries): Albania, Bosnia & Herzegovina, Croatia, Georgia, Montenegro, Romania, Slovenia, Ukraine.
